AB - J02533039 A liquefaction mixed gas evaporation feeder for
sterilisation is disclosed. A gas cylinder (3) encloses a liquefied
mixed gas of ethylene oxide and carbon di:oxide. A feeder supplies the
liquefied mixed gas to a sterilisation appts. (2). The feeder is a
buffer tank (1). A control device controls the supply of the mixed gas
from the gas cylinder to maintain the pressure in the buffer tank
below the pressure at which the ethylene oxide and the carbon di:oxide
coexist in a state of evaporation.

- USE - For sterilising medical appliances, medical material, etc.

- ADVANTAGE - High performance sterilisation is achieved.

- (Dwg.1/1)
